LOTUS TEMİZLENEBİLİR GİYOTİN SİSTEMİ

Lotus Cleansable Guillotine System

Giyotin cam sistemi, genellikle büyük cam yüzeylerin açılabilir pencere veya kapı olarak kullanılabilmesini sağlayan bir tür cam sistemi veya cam düzenlemesini ifade eder. Bu sistem, özellikle ticari binalarda, otellerde veya büyük yapılarda tercih edilen bir cam açma mekanizmasıdır.

Giyotin cam sistemi, mekanın doğal havalandırılması veya büyük cam yüzeylerin geçiş açıklıkları olarak kullanılabilmesi için idealdir. Özellikle güzel hava koşullarında iç ve dış mekan arasındaki geçişi kolaylaştırır.

Alüminyum giyotin sistemleri, modern bina tasarımında popüler bir tercih haline gelmiştir. Estetik açıdan çekici ve dayanıklı olmaları, birçok yapı projesinde tercih edilmelerinin nedenlerindendir. Ayrıca, enerji tasarrufu ve iç mekan konforunu artırma potansiyeli sunarlar.

The guillotine glass system generally refers to a type of glass system or arrangement that allows large glass surfaces to be used as operable windows or doors. This system is a preferred glass opening mechanism, particularly in commercial buildings, hotels, or large structures.

The guillotine glass system is ideal for natural ventilation of the space or for use as large glass openings. It facilitates the transition between indoor and outdoor environments, especially in good weather conditions.

Aluminum guillotine systems have become a popular choice in modern building design. Their aesthetic appeal and durability are among the reasons they are preferred in many construction projects. Additionally, they offer the potential to increase energy efficiency and indoor comfort.

Interior of Art

İç Yaşamda Sanat

RAL renk standardına göre seçtiğiniz tüm renkler uygulanabilir.

Colouring of your choice, according to the RAL colour standard.

Yağmur ve rüzgar gibi hava şartlarına son derece dayanıklıdır.

It is extremely resistant to weather conditions such as rain and wind.

Materyal // 6063 T5 alüminyum, paslanmaz çelik ve derlin.

Materials // 6063 T5 aluminum, stainless steel and derlin.

- Temizlenebilir giyotin cam sistemleri, cam panelleri yatay bir eksenle döndürerek temizlik işlemini kolaylaştırır. Bu sistem sayesinde cam yüzeylere erişim daha rahat ve güvenli hale gelir. Temizlik yapmak için cam panelleri indirip çıkarmak veya dışarıya çıkarmak gerekmez.
-
- Sistem komple kapalıyken camların iç yüzeyleri rahatlıkla silinebilmektedir.

"Cleanable guillotine glass systems facilitate the cleaning process by rotating the glass panels on a horizontal axis. This system makes accessing glass surfaces easier and safer. There is no need to lower or remove the glass panels or go outside to clean.

The inner surfaces of the glass can be easily cleaned when the system is fully closed."

Artminyum

Sistem kapalı konumdayken , en alttaki cam kol yardımıyla içe açılarak dış yüzeyinin temizliği yapılabilir.

Ortada bulunan cam, en alttaki cam açık konuma geldikten sonra , açılarak dış yüzeyinin temizliği yapılabilir.

Sistemin tekrar normal açılıp kapanma konumuna alınabilmesi için kilit mekanizması kapalı konuma getirilmelidir.

Sistem komple açık konumdayken ise en üstteki camın dış yüzeyinin temizliği yapılabilir.

While the system is in the closed position, the bottommost glass can be opened inwards using the lever to clean its outer surface.

The glass in the middle can be opened for cleaning its outer surface after the bottommost glass is opened in the open position.

To return the system to its normal open and closed position, the locking mechanism must be closed.

When the system is fully open, the outer surface of the topmost glass can be cleaned.
